The AUTODOME 7000 IP is an easy to install, high-speed PTZ dome camera, in a field-proven housing suitable for indoor or outdoor installation, that delivers unmatched picture quality and network performance day and night. The camera provides complete network-based control of all dome functionality including pan/tilt/zoom operation, presets, tours and alarms as well as web-based configuration of all dome settings. It also provides direct network video streaming using H.264 compression / bandwidth throttling to efficiently manage bandwidth and storage requirements while delivering outstanding image quality.

### Functions

**High-performance PTZ day/night camera**
The camera has a 1/4-in. CCD sensor, with 4CIF/D1 resolution and sensitivity to below 1.0 lux, and is available with a choice of 28x and the industry-leading 36x optical zoom lens. Both camera options have a full 12x digital zoom and provide D1 horizontal resolution for outstanding clarity and image detail. The camera also incorporates Wide Dynamic Range (WDR) technology that allows for the capture of clear images from both bright and dark areas in the same frame. WDR ensures that bright areas are not saturated and that dark areas are not too dark. Day/night capabilities and outstanding sensitivity make the camera an exceptional performer in all lighting conditions. In low light, the camera switches automatically from color to monochrome by removing the IR filter to boost the infrared illumination sensitivity, while maintaining superior image quality. For operation in the darkest conditions, the SensUp control feature automatically reduces the shutter speed to as little as one second. This increases sensitivity by more than 50 times.

**Progressive scan**
The camera is ideally suited for IP imaging applications. The progressive scan technology in the camera provides smooth and clear images when viewing images from the camera.
Sodium vapor lamp white balance
The camera is an exceptional performer when capturing video under a sodium vapor lamp (a street lamp or tunnel lamp, for example). Uncorrected images under these conditions have a yellowish tint, which can make identification difficult. In the Sodium Vapor White Balance mode, the camera automatically compensates for the light from a sodium vapor lamp to restore objects to their original color.

Virtual masking
The camera offers Virtual Masking, which gives users flexibility to mask parts of the scene which should not be considered for flow analysis to trigger Intelligent Tracking. This allows users to mask from Intelligent Video Analytics/Tracking any background motion (moving trees, pulsating lights, and busy roads) in the scene without blocking the motion from the video.

Intelligent Tracking
The camera utilizes the built-in Intelligent Video Analytics to follow an individual or an object continuously.
When Intelligent Video Analytics detects objects while the camera is in a stationary position, the camera activates the Intelligent Tracking feature. This feature controls the pan/tilt/zoom actions of the camera to track the objects and keep them in view in the scene. The new Intelligent Tracking is based on robust flow detection algorithms which can reliably track moving objects even under challenging scenes.
The tracking and detection reliability can be enhanced further with virtual masking for scenes with a lot of background motion such as trees or other objects creating constant motion in the scene.
The camera supports three modes for Intelligent Tracking:

Auto mode: When configured in this mode, the camera actively analyzes the video to detect any moving object. If it detects movement, it begins to track the object. This mode is most useful for scenarios where normally no motion is expected.

One Click mode: In this mode, users can click an object moving in the live video image to enable the camera to track the movement of the selected object. This mode is most useful for scenarios where normal scene activity is expected.

Triggered mode: In this mode, the camera continuously analyzes the scene for alarms or rule violations. If a rule is violated, it triggers the advanced tracking feature of the camera to start following the object / person that triggered the alarm.
This unique combination of robust Intelligent Video Analytics and Intelligent Tracking allows the camera to track moving objects of interest without getting distracted by other moving objects in the scene.

Intelligence
With built-in video content analysis, the AUTODOME reinforces the Intelligence-at-the-Edge concept where edge devices become increasingly intelligent.

The AUTODOME comes with Bosch’s Intelligent Video Analysis (IVA) built-in. IVA is state-of-the-art intelligent video analysis that reliably detects, and analyzes moving objects while suppressing unwanted alarms from spurious sources in the image. The IVA functionality built into the AUTODOME is able to detect idle and removed objects as well as loitering, multiple line crossing, and trajectories. IVA also supports BEV (Bird’s Eye View) People counting. Assisted Self Calibration and configurable detection filters improve reliability and reduce operator work load.

AUTODOME 7000 PTZ drive and mechanism
The AUTODOME 7000 supports 256 pre-positions and two styles of Guard Tours: Preset and Record/Playback. Users can configure the preset standard tour with as many as 256 sequential pre-positions, with a configurable dwell time between pre-positions. The AUTODOME Series also provides support for two recorded tours, which are recorded macros of an operator’s movements, including pan, tilt, and zoom activities, and can be played back with the click of a button.
Pan and tilt preset repeatability are accurate to within ±0.1 degrees to ensure that the correct scene is captured every time. The camera delivers variable pan/tilt speeds from a crawl speed of only 0.1 degrees per second to a full 400 degrees per second. The camera is capable of pan speeds of 400 degrees per second and tilt speeds of 300 degrees per second between pre-positions. The camera provides a tilt angle 18 degrees above the horizon, and a pan range of up to 360 degrees continuous rotation.
The AutoScaling (proportional zoom) and AutoPivot (automatically rotates and flips the camera) features ensure optimal control.

Five (5) pre-programmed user modes
Five pre-programmed but configurable user modes, optimized with the best settings for a variety of typical applications, make camera programming on-site easy and user-friendly. Users select from the menu the mode that best defines the environment in which the camera is installed:

• Outdoor – general day-to-night changes with sun highlights and street lighting
• Indoor – general day-to-night changes without sun highlights and street lighting
• Low light –optimized for sufficient details at low light
• Motion – monitoring traffic or fast moving objects; motion artifacts are minimized
• Vibrant – enhanced contrast color reproduction and sharpness

Users have the ability to customize these modes, if necessary, for the specific requirements of the site.
Superior privacy masking
The camera provides 24 individual, easy to configure privacy masks, with up to 8 displayed in the same scene. As the camera is zoomed, each mask changes size smoothly and quickly, ensuring that the covered object cannot be seen in most cases.

Comprehensive streaming capabilities on Bosch’s Common Product Platform (CPP4)
The camera has an advanced, efficient H.264 encoder (CPP4) embedded for DVD-quality streaming video and very efficient streaming and network capabilities. The new platform supports simultaneous streaming of individually configurable SD streams (H.264 and MJPEG), and allows a choice of SD resolution.

Recording and storage management
A memory card (SD (Secure Digital), SDHC (Secure Digital High Capacity), or SDXC (Secure Digital eXtended Capacity)) can be used for local alarm recording or for scheduled local recording to improve the overall recording reliability. Recording management can be controlled by the Bosch Video Recording Manager (VRM), or the camera can use iSCSI targets directly without any recording software.

Advanced networking capabilities
The AUTODOME offers advanced capabilities so you can configure the camera to take advantage of the latest networking technology. The AUTODOME offers Quality of Service (QoS) configuration options to ensure fast network response to PTZ data and images. Quality of Service (QoS) is the set of techniques to manage network resources. QoS manages the delay, delay variation (jitter), bandwidth, and packet loss parameters to guarantee the ability of a network to deliver predictable results. QoS identifies the type of data in a data packet and divides the packets into traffic classes that can be prioritized for forwarding. The AUTODOME also supports the IPv6 internet-layer protocol for packet-switched internetworking across multiple IP networks. IPv6 uses 128-bit addresses (IPv4 uses 32-bit addressing), which allows for more devices and users on the internet as well as extra flexibility in allocating addresses and efficiency for routing traffic.

Ease of installation and servicing
The camera has been designed for quick and easy installation, a key feature from Bosch IP video products. All housings feature recessed screws and latches for increased tamper resistance. AUTODOME in-ceiling housings provide IP54 protection. With an optional, impact-resistant, rugged polycarbonate bubble (sold separately), they are rated IK 8 (IEC 62262) to protect the camera from vandalism. The rugged bubble can withstand impacts equivalent to a 4.5 kg (10 lb) weight dropped from a height of 3 m (10 ft).

Indoor/outdoor pendant housings are rated to provide IP66 protection and offer an operating temperature range down to -40 °C (-40 °F). The indoor/outdoor pendant comes fully assembled with a sunshield and ready for wall or pipe applications with the proper mounting hardware (sold separately). In addition, the camera models with pendant housing come equipped with a low-impact, high-resolution acrylic bubble for enhanced image clarity. You can easily convert the outdoor pendant for indoor applications by removing the sunshield.

Bosch offers a full complement of hardware and accessories (sold separately) for wall, corner, mast, roof, pipe mount, and in-ceiling applications, which allow the camera to be adapted easily to individual site requirements.

Video management system support
The camera ships with Bosch Video Client (BVC), an easy-to-use software from Bosch that is suitable for midsize installations. For large enterprise systems, AUTODOME cameras can be used with Bosch Video Management System (BVMS), which allows enhanced video management and viewing capabilities. In addition, the camera is supported/integrated into all of the leading third party video management systems.

ONVIF conformat
The AUTODOME Series conforms to the ONVIF Profile S specification allowing easy integration with the conformat devices and VMS. For more information about ONVIF, visit www.onvif.org.

The camera conforms to the ONVIF (Open Network Video Interface Forum) specification which guarantees interoperability between network video products regardless of manufacturer. ONVIF conformat devices are able to exchange live video, audio, metadata and control information. They are automatically discovered and connected to network applications such as video management systems.

Fiber Optic Kit
Bosch offers the optional VG4-SFPSCKT, a unique media converter module for use with various Bosch devices. This media converter module is designed to accept a wide-range of 10/100 Mbps SFP modules for use with Multimode or Single-mode optical fiber with LC or SC connectors.

The media converter module along with the SFP module is user-installed directly into the camera’s power supply box to provide an integrated fiber optic solution.

As with all Bosch products, the camera is designed using the industry’s best design process and is subjected to the most stringent testing standards such as HALT (highly accelerated life testing), which pushes the limits of products to ensure reliability throughout their lifetime.
Access security
Various security levels are available for accessing the network, the camera, and the data channels. As well as password protection with three levels, 802.1x authentication using a RADIUS (Remote Authentication Dial In User Service) server is supported. To secure Web browser access, use HTTPS with a SSL certificate stored in the camera.

Easy upgrade
Remotely upgrade the camera whenever new firmware becomes available. This ensures up-to-date products, thus protecting investment with little effort.

Certifications and approvals

Electromagnetic Compatibility (EMC)  
Complies with FCC Part 15, ICES-003, and CE regulations, including EN 50130-4, EN 55022 Class A, EN 61100-3-3, EN 61000-6-1, EN 61000-6-2, and EN 50121-4 (Railway applications)

Product Safety  
Complies with CE regulations, UL, CSA, EN, and IEC Standards EN60950-1

Environmental  
In-ceiling: IP54, Plenum rated (with acrylic bubble)  
Also: IK8 rating when using optional Polycarbonate bubble, sold separately  
Indoor/Outdoor Pendant: IP66, NEMA 4X

ONVIF conformance  
EN 50132-5-2

Notice
Conformity to EN 50130-4
One of the following power supply units is required to conform to the EN 50130-4 standard: VG4-A-PSU0, VG4-A-PSU1, VG4-A-PSU2, VG4-A-PA0, VG4-A-PA1, or VG4-A-PA2.

- Recording: Continuous recording of video and audio, alarm/events/schedule recording

### Fiber Optic Kit
#### VG4-SFPSCKT
- Description: Fiber Optic Ethernet Media Converter kit<sup>5</sup>. Requires a small form-factor pluggable (SFP) module (sold separately).
- Data Interface: Ethernet
- Data Rate: 10/100 Mbps
- Compatible Receiver: CNFE2MC
- Installation: Installed inside a VG4-A-PA0, VG4-A-PA1, VG4-A-PA2, VG4-A-PSU1, or a VG4-A-PSU2 power supply box with supplied mounting hardware

#### SFP Modules
- Description: Interchangeable modules available for use with MMF or SMF optical fiber.
- Data Interface: Ethernet
- Data Rate: 10/100 Mbps
- Weight (all SFP modules): 0.23 kg (0.05 lb)
- Dimensions (LxWxH): SFP-2, SFP-3: 55.5 x 13.5 x 8.5 mm (2.2 x 0.5 x 0.3 in.)
  - SFP-25, SFP-26: 63.8 x 13.5 x 8.5 mm (2.5 x 0.5 x 0.3 in.)

---

<sup>5</sup> Kit available separately and must be installed inside the AUTODOME power supply box.

**Fiber Compatibility**

- **Optical Fiber Compatibility, MMF**: 50/125 µm MMF. For 50/125 µm fiber, subtract 4 dB from the specified optical budget value. Must meet or exceed fiber standard ITU-T G.651.
- **Optical Fiber Compatibility, SMF**: 8–10/125 µm SMF. Must meet or exceed fiber standard ITU-T G.652.
- **Optical Distance Specifications**: Specified transmission distances are limited to the optical loss of the fiber and any additional loss introduced by connectors, splices, and patch panels. The modules are designed to operate over the entire optical loss budget range, so they do not require a minimum loss in order to operate.

**Miscellaneous**

- **Sectors/Titling**: 16 independent sectors with a 20-character title/sector
- **Masking**: 24 individually configurable privacy masks
- **Pre-positions**: 256, each with a 20-character title
- **Guard Tours**: Two (2) types of tours:
  - Recorded tours – two (2)
  - Preset tour – one (1), consisting of up to 256 scenes, consecutively
- **Supported Languages**: English, Chinese, Dutch, French, German, Italian, Japanese, Polish, Portuguese, and Spanish

**User Connections**

- **Power, Camera**: RJ-45 10/100 Base-TX Ethernet (High Power-over-Ethernet (High PoE)) or PoE+ (IEEE 802.3at, class 4 standard) 21-30 VAC, 50/60 Hz
- **Power, Heater**: RJ-45 10/100 Base-TX Ethernet (High Power-over-Ethernet (High PoE)) 21-30 VAC, 50/60 Hz
- **Video and Control**: RJ-45 10/100 Base-TX Ethernet

**Environmental**

- **In-Ceiling**
  - IP54, Plenum rated
  - NEMA 4X for:
    - Access to Hazardous parts
    - Ingress of solid foreign objects (falling dirt, circulating dust, settling dust)
    - Ingress of water (dripping and light splashing, hosedown and splashing)
    - Corrosive agents
- **Pendant**
  - IP66

**Operating Temp.**

- -10°C to 40°C (14°F to 104°F)
- -40°C to 55°C (-40°F to 131°F) or -10°C to 55°C (14°F to 131°F)³

**Storage Temp.**

- -40°C to 60°C (-40°F to 140°F)

**Humidity**

- 0% to 90% relative, non-condensing
- 0% to 100% relative, condensing

6. Without heater connected in power supply box for indoor applications.

Meets requirements for NEMA 4X, except impact test, with use of an acrylic bubble.

**Construction**

- **Dimensions**: See dimensional drawings
- **Weight**
  - In-ceiling: 2.58 kg (5.69 lb)
  - Indoor/Outdoor Pendant: 3.06 kg (6.75 lb)
- **Bubble Size**: 153.1 mm diameter (6.03 in.)
- **Construction Material**
  - **Housing**: In-ceiling: Magnesium Pendant: Cast aluminum
  - **Bubble**: In-ceiling: High-resolution acrylic, rugged polycarbonate, or HD high-resolution acrylic Pendant: High-resolution acrylic or rugged polycarbonate

### Mounts/Accessories

#### Bubbles

**In-ceiling**
- Clear high-resolution acrylic *(Included with in-ceiling PAL camera models.)*
  - VGA-BUBBLE-CCLA
- Tinted high-resolution acrylic *(Included with in-ceiling NTSC camera models.)*
  - VGA-BUBBLE-CTIA
- Clear rugged polycarbonate
  - VGA-BUBBLE-CCLR
- Tinted rugged polycarbonate
  - VGA-BUBBLE-CTIR
- Clear HD high-resolution acrylic
  - VGA-BUBHD-CCLA
- Tinted HD high-resolution acrylic
  - VGA-BUBHD-CTIA

**Pendant**
- Clear high-resolution acrylic *(Included with pendant camera models.)*
  - VGA-BUBBLE-PCLA
- Tinted high-resolution acrylic
  - VGA-BUBBLE-PTIA
- Clear rugged polycarbonate
  - VGA-BUBBLE-PCLR
- Tinted rugged polycarbonate
  - VGA-BUBBLE-PTIR

Ordering information

VG5-7028-C1PC4 IP 28x In-ceiling PAL with Clear Bubble
Indoor IP PTZ camera with superb video quality and enhanced features such as Intelligent Tracking, dual recording options, and multiple pre-programmed user modes for easy installation.
Order number VG5-7028-C1PC4@91

VG5-7028-C1PC4 IP 28x In-ceiling NTSC with Tinted Bubble
Indoor IP PTZ camera with superb video quality and enhanced features such as Intelligent Tracking, dual recording options, and multiple pre-programmed user modes for easy installation.
Order number VG5-7028-C2PT4@94

VG5-7028-E1PC4 IP 28x Indoor/Outdoor Pendant PAL with Clear Bubble
Indoor/outdoor IP PTZ camera with superb video quality and enhanced features such as Intelligent Tracking, dual recording options, and multiple pre-programmed user modes for easy installation.
Order number VG5-7028-E1PC4@91

VG5-7028-E2PC4 IP 28x Indoor/Outdoor Pendant NTSC with Clear Bubble
Indoor/outdoor IP PTZ camera with superb video quality and enhanced features such as Intelligent Tracking, dual recording options, and multiple pre-programmed user modes for easy installation.
Order number VG5-7028-E2PC4@94

VG5-7036-E1PC4 IP 36x Indoor/Outdoor Pendant PAL with Clear Bubble
Indoor/outdoor IP PTZ camera with superb video quality and enhanced features such as Intelligent Tracking, dual recording options, and multiple pre-programmed user modes for easy installation.
Order number VG5-7036-E1PC4@91

VG5-7036-E2PC4 IP 36x Indoor/Outdoor Pendant NTSC with Clear Bubble
Indoor/outdoor IP PTZ camera with superb video quality and enhanced features such as Intelligent Tracking, dual recording options, and multiple pre-programmed user modes for easy installation.
Order number VG5-7036-E2PC4@94

Accessories

VG4-A-PSU0 24 VAC Power Supply Unit
Power supply, 24 VAC input, for a PTZ camera in the AUTODOME Series. White, aluminum enclosure with cover, rated IP66 and IK 08. 100 W output. Optional trim skirt (sold separately).
Order number VG4-A-PSU0

VG4-A-PSU1 120 VAC Power Supply Unit
Power supply, 120VAC input, 24VAC output @ 96VA. Suitable for powering AUTODOME, MIC IP 7000, and MIC IP fusion 9000i cameras. White aluminum enclosure with cover. IP66 ingress. IK10 impact.
Order number VG4-A-PSU1@2

VG4-A-PSU2 230 VAC Power Supply Unit
Power supply, 230VAC input, 24VAC output @ 96VA. Suitable for powering AUTODOME, MIC IP 7000, and MIC IP fusion 9000i cameras. White aluminum enclosure with cover. IP66 ingress. IK10 impact.
Order number VG4-A-PSU2

NPD-6001A High PoE midspan 60 W, single port, AC in
High Power, 60 W Single Port PoE Midspan with AC in
Order number NPD-6001A

VG4-A-PA0 Pendant Arm Mount
Pendant arm mount with power supply box for an AUTODOME Series camera, no transformer, white
Order number VG4-A-PA0@1
**VG4-A-PA1 Pendant Arm Mount with 120 VAC Transformer**
Pendant arm mount with power supply box for an AUTODOME Series camera with a 120 VAC transformer, white
Order number VG4-A-PA1

**VG4-A-PA2 Pendant Arm Mount with 230 VAC Transformer**
Pendant arm mount with power supply box for an AUTODOME Series camera with a 230 VAC transformer, white
Order number VG4-A-PA2@1

**VGA-PEND-ARM Pendant Arm with Wiring**
Compatible with an AutoDome Series pendant housing
Order number VGA-PEND-ARM@1

**VGA-PEND-WPLATE Mounting Plate**
Mounting plate for VGA-PEND-ARM, compatible with an AutoDome Series camera
Order number VGA-PEND-WPLATE

**VGA-ROOF-MOUNT Roof Mount**
Roof parapet mount, white
VG5-6xx/7xxx cameras require VG4-A-9543 Pipe Mount (sold separately).
NEZ-5130-/NEZ-5230- cameras require NDA-ADPTR-NPTMET (sold separately)
Order number VGA-ROOF-MOUNT

**LTC 9230/01 Flat Roof Mount Adapter**
Flat Roof Mount Adapter for mounting a unit in an upright position on a flat surface.
Order number LTC 9230/01

**VG4-A-9541 Pole Mount Adapter**
Pole mount adapter for an AUTODOME pendant arm or a DINION imager, designed for poles with a diameter of 100-380 mm (4-15 in.), white
Order number VG4-A-9541

**VG4-A-9542 Corner Mount Adapter**
Corner mount adapter for an AUTODOME pendant arm or a DINION imager
Order number VG4-A-9542

**VG4-A-9543 Pipe Mount**
Pipe mount, white, for an AutoDome Series pendant housing
Order number VG4-A-9543

**VGA-IC-SP In-ceiling Support Kit**
Suspended ceiling support kit for dome cameras. Aperture Ø177 mm (Ø7 in). Maximum supported weight 11.3 kg (25 lb).
Order number VGA-IC-SP

**VGA-SBOX-COVER Cover for AUTODOME Power Supply Boxes**
Cover for AUTODOME Power Supply Boxes, white
Order number VGA-SBOX-COVER

**VG4-A-TSKIRT Trim Skirt for AUTODOME Power Supply Boxes**
Trim skirt for the following AutoDome Series power supply boxes:
VG4-A-PSU0, VG4-A-PSU1, and VG4-A-PSU2
Order number VG4-A-TSKIRT

**VGA-BUBBLE-CCLR Clear Rugged Bubble for an In-ceiling Housing**
Impact resistant polycarbonate bubble
Order number VGA-BUBBLE-CCLR

**VGA-BUBBLE-CTIR Tinted Rugged Bubble for an In-ceiling Housing**
Impact resistant polycarbonate bubble
Order number VGA-BUBBLE-CTIR

**VGA-BUBBLE-CCLA Clear High-resolution Bubble for an In-ceiling Housing**
Low-impact acrylic bubble
Order number VGA-BUBBLE-CCLA

**VGA-BUBBLE-CTIA Tinted High-resolution Bubble for an In-ceiling Housing**
Low-impact acrylic bubble
Order number VGA-BUBBLE-CTIA

**VGA-BUBBLE-PCLR Clear Rugged Bubble for a Pendant Housing**
Impact resistant polycarbonate bubble
Order number VGA-BUBBLE-PCLR

**VGA-BUBBLE-PTIR Tinted Rugged Bubble for a Pendant Housing**
Impact resistant polycarbonate bubble
Order number VGA-BUBBLE-PTIR

**VGA-BUBBLE-PCLA Clear High-resolution Bubble for a Pendant Housing**
Low-impact acrylic bubble
Order number VGA-BUBBLE-PCLA

**VGA-BUBBLE-PTIA Tinted High-resolution Bubble for a Pendant Housing**
Low-impact acrylic bubble
Order number VGA-BUBBLE-PTIA

**VGA-BUBHD-CCLA Clear HD High-Resolution Acrylic Bubble for In-Ceiling AUTODOME cameras**
High-resolution acrylic bubble for AUTODOME HD in-ceiling cameras, clear
Order number VGA-BUBHD-CCLA

**VGA-BUBHD-CTIA Tinted HD High-Resolution Acrylic Bubble for In-Ceiling AUTODOME cameras**
High-resolution acrylic bubble for AUTODOME HD in-ceiling cameras, tinted
Order number VGA-BUBHD-CTIA

**VG4-SFPSCKT Fiber Optic Ethernet Media Converter Kit**
Ethernet media converter video transmitter/data receiver fiber optic kit for AUTODOME cameras and for MIC-IP-PSU for MIC analog cameras.
Order number VG4-SFPSCKT
