The AUTODOME IP starlight 7000 HD is a high-speed PTZ dome camera that delivers unmatched picture quality and network performance day and night. The camera has superb high-definition (HD) 1080p25/30 video and 30x optical zoom. Easy to install, the camera is available in either a field-proven, indoor/outdoor pendant housing or an indoor, in-ceiling housing. The camera provides complete network-based control of all dome functionality including pan/tilt/zoom operation, presets, tours and alarms as well as web-based configuration of all dome settings. It also provides direct network video streaming using H.264 compression / bandwidth throttling to efficiently manage bandwidth and storage requirements while delivering outstanding image quality.

**Functions**

**Exceptional low-light performance**
The latest sensor technology combined with the sophisticated noise suppression results in an exceptional sensitivity in color. The low-light performance is so good that the camera continues to provide excellent color performance even with a minimum of ambient light.

With built-in video content analysis (VCA), the camera reinforces the Intelligence-at-the-Edge concept where edge devices become increasingly intelligent. The camera comes with the state-of-the-art VCA method by Bosch, Intelligent Video Analytics, that reliably detects, and analyzes moving objects while suppressing unwanted alarms from spurious sources in the image.

With this method, the camera is able to detect idle and removed objects as well as loitering, multiple line crossing, and trajectories. This method also supports BEV (Bird’s Eye View) People counting.

**Intelligent Tracking**
The camera utilizes the built-in Intelligent Video Analytics to follow an individual or an object continuously.

When Intelligent Video Analytics detects objects while the camera is in a stationary position, the camera activates the Intelligent Tracking feature. This feature controls the pan/tilt/zoom actions of the camera to track the objects and keep them in view in the scene. The new Intelligent Tracking is based on robust flow detection algorithms which can reliably track moving objects even under challenging scenes.
The tracking and detection reliability can be enhanced further with virtual masking for scenes with a lot of background motion such as trees or other objects creating constant motion in the scene.

The camera supports three modes for Intelligent Tracking:

**Auto mode**: When configured in this mode, the camera actively analyzes the video to detect any moving object. If it detects movement, it begins to track the object. This mode is most useful for scenarios where normally no motion is expected.

**One Click mode**: In this mode, users can click an object moving in the live video image to enable the camera to track the movement of the selected object. This mode is most useful for scenarios where normal scene activity is expected.

**Triggered mode**: In this mode, the camera continuously analyzes the scene for alarms or rule violations. If a rule is violated, it triggers the advanced tracking feature of the camera to start following the object/person that triggered the alarm. This unique combination of robust Intelligent Video Analytics and Intelligent Tracking allows the camera to track moving objects of interest without getting distracted by other moving objects in the scene.

**Virtual masking**

The camera offers Virtual Masking, which gives users flexibility to mask parts of the scene which should not be considered for flow analysis to trigger Intelligent Tracking. This allows users to mask from Intelligent Video Analytics/Tracking any background motion (moving trees, pulsating lights, and busy roads) in the scene without blocking the motion from the video.

**Dual power options**

All AUTODOME starlight models can be powered by either a PoE+ (IEEE 802.3at)-capable network switch or a High PoE midspan.

Rated for indoor installation only, the midspan can be installed indoors and wired to a camera installed outdoors.

The midspan provides surge protection, optimal for installation of outdoor powered devices.

The midspan has a single port and is designed to carry data and power over a standard CAT5e (or better) cable, delivered through all 4 pairs.

For additional system reliability, users can connect 24 VAC power and PoE to provide fully redundant power to the camera without disruption to operation.

**DORI coverage**

DORI (Detect, Observe, Recognize, Identify) is a standard system (EN-62676-4) for defining the ability of a camera to distinguish persons or objects within a covered area. The maximum distance at which a camera/lens combination can meet these criteria is shown below:

<table>
<thead>
<tr>
<th></th>
<th>DORI definition</th>
<th>Distance WIDE 1X</th>
<th>TELE 30X</th>
</tr>
</thead>
<tbody>
<tr>
<td>Detect</td>
<td>25 px/m (8 px/ft)</td>
<td>62 m (193 ft)</td>
<td>1913 m (5978 ft)</td>
</tr>
<tr>
<td>Observe</td>
<td>63 px/m (19 px/ft)</td>
<td>25 m (81 ft)</td>
<td>759 m (2517 ft)</td>
</tr>
<tr>
<td>Recognize</td>
<td>125 px/m (38 px/ft)</td>
<td>12 m (41 ft)</td>
<td>383 m (1259 ft)</td>
</tr>
<tr>
<td>Identify</td>
<td>250 px/m (76 px/ft)</td>
<td>6 m (20 ft)</td>
<td>191 m (629 ft)</td>
</tr>
</tbody>
</table>

**Five (5) pre-programmed user modes**

Five pre-programmed but configurable user modes, optimized with the best settings for a variety of typical applications, make on-site programming easy and user-friendly. Users select from the menu the mode that best defines the environment in which the camera is installed:

- **Outdoor** – General day-to-night changes with sun highlights and street lighting
- **Indoor** – Ideal mode for indoor applications where lighting is constant and not changing
- **Low light** – Optimized for sufficient details at low light
- **Motion** – Monitoring traffic or fast moving objects; motion artifacts are minimized
- **Vibrant** – Enhanced contrast color reproduction and sharpness

Users have the ability to customize these modes, if necessary, for the specific requirements of the site.

**Image Stabilization**

As PTZ cameras continue to increase their optical zoom capabilities, image stabilization becomes critical to eliminate movement caused by unstable camera mounts. Minor movement of the camera mount can
shift the field of view by a large distance when the camera is zoomed to a high value. This can render images unusable. The camera incorporates an Image Stabilization algorithm that allows the camera to detect continuous vibration. If it detects vibration, the camera dynamically corrects the shaky video in both the vertical and horizontal axis, resulting in exceptional image clarity and a stable field of view on the monitor.

**Superior privacy masking**
The camera provides 24 individual, easy to configure privacy masks, with up to 8 displayed in the same scene. As the camera is zoomed, each mask changes size smoothly and quickly, ensuring that the covered object cannot be seen in most cases.

**Sophisticated alarm responses**
The camera supports advanced alarm control that uses sophisticated rules-based logic to determine how to manage alarms. In its most basic form, a “rule” could define which input(s) should activate which output(s). In a more complex form, inputs and outputs can be combined with pre-defined or user-specified commands to perform advanced camera functions.

**PTZ drive and mechanism**
The AUTODOME 7000 supports 256 pre-positions and two styles of Guard Tours: Preset and Record/Playback. Users can configure the preset standard tour with as many as 256 sequential pre-positions, with a configurable dwell time between pre-positions. The AUTODOME Series also provides support for two recorded tours, which are recorded macros of an operator’s movements, including pan, tilt, and zoom activities, and can be played back with the click of a button.

Pan and tilt preset repeatability are accurate to within ±0.1 degrees to ensure that the correct scene is captured every time. The camera delivers variable pan/tilt speeds from a crawl speed of only 0.1 degrees per second to a full 400 degrees per second. The camera is capable of pan speeds of 400 degrees per second and tilt speeds of 300 degrees per second between pre-positions. The camera provides a tilt angle 18 degrees above the horizon, and a pan range of up to 360 degrees continuous rotation.

**Content Based Imaging Technology**
Content Based Imaging Technology (CBIT) is used to radically improve image quality in all lighting conditions and to identify areas for enhanced processing. The camera examines the scene using intelligent video analytics and provides feedback to re-tune the image processing. This provides better detail in the areas that matter and better all-round performance.

**Intelligent Defog**
Users can configure the mode to be active continuously, or to activate automatically when the video analytics in the camera detect fog and add light to the video image (and then deactivate when the fog clears or the scene changes).

**Intelligent Dynamic Noise Reduction reduces bandwidth and storage requirements**
The camera uses Intelligent Dynamic Noise Reduction which actively analyzes the contents of a scene and reduces noise artifacts accordingly. The low-noise image and the efficient H.264 compression technology provide clear images while reducing bandwidth and storage by up to 50% compared to other H.264 cameras. This results in reduced-bandwidth streams that still retain a high image quality and smooth motion. The camera provides the most usable image possible by cleverly optimizing the detail-to-bandwidth ratio.

**Bitrate optimized profile**
The average typical optimized bitrate in kbits/s for various frame rates is shown in the table:

<table>
<thead>
<tr>
<th>FPS</th>
<th>1080p</th>
<th>720p</th>
<th>480p</th>
</tr>
</thead>
<tbody>
<tr>
<td>60</td>
<td>--</td>
<td>2600</td>
<td>2000</td>
</tr>
<tr>
<td>30</td>
<td>2600</td>
<td>1300</td>
<td>1000</td>
</tr>
<tr>
<td>15</td>
<td>2100</td>
<td>1100</td>
<td>800</td>
</tr>
<tr>
<td>10</td>
<td>1800</td>
<td>1000</td>

<td>600</td>
<td>450</td>
</tr>
<tr>
<td>2</td>
<td>500</td>
<td>270</td>
<td>200</td>
</tr>
</tbody>
</table>

Actual bitrate may vary depending on the scene complexities and encoding configurations.

**Common product platform (CPP4)**
The camera has an advanced, efficient H.264 encoder (CPP4) embedded for high quality HD streaming video and very efficient streaming and network capabilities. The new platform supports simultaneous streaming of individually configurable HD streams, and allows a choice of HD resolution in combination of SD resolutions.

**Advanced streaming**
The camera offers advanced streaming capabilities so that you can configure the camera to take advantage of the latest network technology. The camera is designed on the most efficient and powerful H.264 encoding platform capable of delivering high-quality HD video with very low network load. The new intelligent encoding capabilities drops the bandwidth consumption to extremely low levels if the camera detects no motion in the scene.

The camera is capable of quad streaming which allows the camera to be configured to deliver independent, configurable streams for live viewing, recording, or remote monitoring on constrained bandwidths.
Recording and storage management
A memory card (SD (Secure Digital), SDHC (Secure Digital High Capacity), or SDXC (Secure Digital eXtended Capacity)) can be used for local alarm recording or for Automatic Network Replenishment (ANR) to improve the overall recording reliability. Recording management can be controlled by the Bosch Video Recording Manager (VRM), or the camera can use iSCSI targets directly without any recording software.

ONVIF conformant
The camera conforms to the ONVIF (Open Network Video Interface Forum) specification which guarantees interoperability between network video products regardless of manufacturer. The ONVIF Profile S specification allows easy integration with other conformant devices and VMS. ONVIF conformant devices are able to exchange live video, audio, metadata, and control information, and ensure that they are automatically discovered and connected to network applications such as video management systems.

Data security
Special measures have been put in place to ensure the highest level of security for device access and data transport. The three-level password protection with security recommendations allows users to customize device access. Web browser access can be protected using HTTPS and firmware updates can also be protected with authenticated secure uploads. The on-board Trusted Platform Module (TPM) and Public Key Infrastructure (PKI) support, guarantee superior protection from malicious attacks. The 802.1x network authentication with EAP/TLS, supports TLS 1.2 with updated cipher suites including AES 256 encryption.
The advanced certificate handling offers:
- Self-signed unique certificates automatically created when required
- Client and server certificates for authentication
- Client certificates for proof of authenticity
- Certificates with encrypted private keys

Ease of installation and servicing
The camera has been designed for quick and easy installation, a key feature from Bosch IP video products. All housings feature recessed screws and latches for increased tamper resistance. Pendant housings are rated to provide IP66 protection and offer an operating temperature range down to -40 °C (-40 °F). The pendant model comes fully assembled with a sunshield which can be easily removed for use in indoor applications. In addition, both pendant and in-ceiling camera models have a high-resolution acrylic bubble for enhanced image clarity.

Bosch offers a full complement of hardware and accessories (sold separately) for wall, corner, mast, roof, pipe mount, and in-ceiling applications for indoor and outdoor environments, which allow the camera to be adapted easily to individual site requirements. Remotely upgrade the camera whenever new firmware becomes available. This ensures up-to-date products, thus protecting investment with little effort.

Fiber Optic Kit
Bosch offers the optional VG4-SFPSCKT, a unique media converter module for use with various Bosch devices. This media converter module is designed to accept a wide-range of 10/100 Mbps SFP modules for use with Multimode or Single-mode optical fiber with LC or SC connectors. The media converter module along with the SFP module is user-installed directly into the camera’s power supply box to provide an integrated fiber optic solution.

Unsurpassed reliability
As with all Bosch products, the camera is designed using the industry’s best design process and is subjected to the most stringent testing standards such as HALT (highly accelerated life testing), which pushes the limits of products to ensure reliability throughout their lifetime.

Certifications and approvals
For a full list of all related certifications/standards, please refer to the Product Tests Report, available on the online catalog, on the Documents tab of the product page for your device. If the document is unavailable on the product page, please contact your sales representative.

HD standards
- Complies with the SMPTE 274M-2008 Standard in:
  - Resolution: 1920x1080
  - Scan: Progressive
  - Color representation: complies with ITU-R BT.709
  - Aspect ratio: 16:9
  - Frame rate: 25, 30, 50 and 60 frames/s
- Complies with the 296M-2001 Standard in:
  - Resolution: 1280x720
  - Scan: Progressive
  - Color representation: complies with ITU-R BT.709
  - Aspect ratio: 16:9
  - Frame rate: 25, 30, 50 and 60 frames/s

Electromagnetic Compatibility (EMC)
- Complies with FCC Part 15, ICES-003, and CE regulations, including latest versions of
  EN 50130-4
  EN 55032
  EN 61000-3-3
  EN 61000-6-1
  EN 61000-6-2
  EN 50121-4 (Railway applications)

### Video performance - Sensitivity

- **(3100K, reflectivity 89%, 1/30, F1.6, 30 IRE)**
  - Color: 0.0077 lx
  - Monochrome: 0.0008 lx

### Additional Camera Settings

- **Gain control**: AGC, Fixed
- **Aperture Correction**: Horizontal and vertical
- **Electronic Shutter Speed (AES)**: 1/1 sec to 1/10000 sec (22 steps)
- **Signal-to-Noise Ratio (SNR)**: >55 dB

### Day/Night switch

- **Automatic IR cut filter**

### Backlight compensation (BLC)

- **On / Off / Intelligent Auto Exposure (IAE)**

### White balance

- **2000 K to 10,000 K**
  - ATW, AWB Hold, Extended ATW, Manual, Sodium Lamp Auto, Sodium Lamp

### Day/Night

- **Monochrome, Color, Auto**

### Defog mode feature

- Improves visibility when viewing foggy or other low-contrast scenes.

### Video performance - Dynamic range

- **High dynamic range**: 120 dB WDR
- **Measured according to IEC 62676 Part 5**: 100 dB WDR

### Image Stabilization

- On, Off, Auto

### Mechanical

#### In-Ceiling

- **Pan Range**: 360° cont.
- **Tilt Angle**: 1° above horizon
- **Pre-position Speed**: Pan: 400°/s Tilt: 300°/s
- **Pan/Tilt Modes**
  - Turbo mode (Manual Control): Pan: 0.1°/s - 400°/s Tilt: 0.1°/s - 300°/s
  - Normal Mode: 0.1°/s-120°/s 0.1°/s-120°/s
- **Pre-position Accuracy**: ± 0.1° typ. ± 0.1° typ.

#### Pendant

- **Pan Range**: 360° cont.
- **Tilt Angle**: 18° above horizon
- **Pre-position Speed**: Pan: 400°/s Tilt: 300°/s
- **Pan/Tilt Modes**
  - Turbo mode (Manual Control): Pan: 0.1°/s - 400°/s Tilt: 0.1°/s - 300°/s
  - Normal Mode: 0.1°/s-120°/s 0.1°/s-120°/s
- **Pre-position Accuracy**: ± 0.1° typ. ± 0.1° typ.

### Electrical

#### In-Ceiling

- **Input Voltage**: 21-30 VAC, 50/60 Hz; (class II)
- **High PoE**: (using a Bosch model of High PoE Midspan); required to power the heater
- **PoE+**: (IEEE 802.3at, class 4 standard) (when used indoors, not powering the heater)
- **Power Consumption, typical**: 24 W / 44 VA

#### Pendant

- **60 W / 69 VA (heaters on)**
- **or 24 W / 44 VA (heaters off / without heater connected in power supply box for indoor applications)**

### Surge Suppression

- **Protection on Alarm Inputs**: Peak current 17 A, peak power 300 W (8/20 μs)
- **Protection on Alarm Outputs**: Peak current 2 A, peak power 300 W (8/20 μs)
**Protection on Relay Output**
- Peak current 7.3 A, peak power 600 W (10/1000 μs)

**Protection on Power Input (Dome)**
- Peak current 7.3 A, peak power 600 W (10/1000 μs)

**Protection on Power Output (Arm Power Supply)**
- Peak current 21.4 A, peak power 1500 W (10/1000 μs)

**10/100 Ethernet Data Lines**
- Peak current 14 A, peak power 200 W (8/20 μs)

### Software Control
- **Camera Setup/Control**
  - Via web browser (such as Internet Explorer version 7.0 or later), Bosch Configuration Manager, Bosch Video Management System (BVMS), Bosch Recording Station (BRS), or Bosch Video Client (BVC)

- **Software Update**
  - Network firmware upload

### Network
- **Communications Protocols**
  - Standard Bosch IP protocol, including ONVIF and SNMP v1

- **Standards / Video compression**
  - H.264 (ISO/IEC 14496-10), M-JPEG, JPEG

- **Streaming**
  - Four (4) streams with individually configurable frame rate and resolution:
    - Two (2) independently configurable H.264 recording streams
    - Two (2) non-recording streams (profiles)

### Note: The options available for Stream 1 depend on the value in the Max. frame rate field in the Installer Menu in camera configuration.

<table>
<thead>
<tr>

### Protocols
- IPv4, IPv6, UDP, TCP, HTTP, HTTPS, RTCP, IGMP V2/V3, ICMP, ICMPv6, RTSP, FTP, ARP, DHCP, APIPA (Auto-IP, link local address), NTP (SNTP), 802.1x, DNS, DNSv6, DDNS (Dyn.com, selfHOST.de, no-ip.com), SMTP, iSCSI, UPnP (SSDP), DiffServ (QoS), LLDP, SOAP, Dropbox™, CHAP, digest authentication

### Ethernet
- 10BASE-T/100BASE-TX, auto-sensing, half/full duplex

### Encryption
- TLS 1.0, SSL, DES, 3DES, AES

### Ethernet connector
- RJ45

### Connectivity
- ONVIF Profile S, Auto-MDIX

### GOP Structure
- IP, IBBP

### Data Rate
- 9.6 kbps to 6 Mbps

### Overall IP Delay
- 120 ms (60 fps mode)

### Audio
- Standard
  - G.711, 8 kHz sampling rate
  - L16, 16 kHz sampling rate
  - AAC, 16 kHz sampling rate

### Resolution (H x V)
- 1080p HD: 1920 x 1080 (16:9)
- 720p HD: 1280 x 720
- 432p SD: 768 x 432
- 288p SD: 512 x 288
- 144p SD: 256 x 144
### Signal-to-Noise Ratio
- Signal-to-Noise Ratio >50 dB

### Audio Streaming
- Audio Streaming Bidirectional (full-duplex)

### Local Storage
- Memory Card Slot
  - User-supplied SD/SDHC/SDXC memory card (maximum 2TB – SDXC)

### Recording
- Continuous recording of video and audio, alarm/events/schedule recording

### Fiber Optic Kit

### Fiber Compatibility

#### Optical Fiber Compatibility, MMF
- 50/125 µm MMF. For 50/125 µm fiber, subtract 4 dB from the specified optical budget value. Must meet or exceed fiber standard ITU-T G.651.

#### Optical Fiber Compatibility, SMF
- 8–10/125 µm SMF. Must meet or exceed fiber standard ITU-T G.652.

#### Optical Distance Specifications
- Specified transmission distances are limited to the optical loss of the fiber and any additional loss introduced by connectors, splices, and patch panels. The modules are designed to operate over the entire optical loss budget range, so they do not require a minimum loss in order to operate.

### Miscellaneous

White (RAL 9003)

### Standard Finish
Powder coated, sand finish

### Mounts/Accessories

#### Bubbles
- Clear HD high-resolution acrylic
  - VGA-BUBHD-CCLA
- Tinted HD high-resolution acrylic
  - VGA-BUBHD-CTIA

#### Pendant
- Clear high-resolution acrylic
  - (Included with in-ceiling camera models.)
  - VGA-BUBBLE-PCLA
- Tinted high-resolution acrylic
  - VGA-BUBBLE-PTIA
- Clear rugged IK10-rated nylon*
  - VGA-BUBBLE-IK10

### Mounts

#### Pendant Arm Mounts
- Wall Arms
  - VG4-A-PA0 (no transformer)
  - VG4-A-PA1 (120 VAC transformer)
  - VG4-A-PA2 (230 VAC transformer)

- Pendant Arm with Wiring
  - VG4-PEND-ARM
- Mounting plate for VG4-PEND-ARM
  - VG4-PEND-WPLATE
- Trim skirt for VG4 Series Power Supplies
  - VG4-A-TSKIRT

#### Optional Mounting Plates for Arm Mounts
- Corner Mounting Plate
  - VG4-A-9542
- Pole Mounting Plate
  - VG4-A-9541

#### Pendant Pipe Mounts
- Pipe Mount Kit
  - VG4-A-9543

#### Pendant Roof Mounts
- Roof (Parapet) Mount
  - VG4-9543 Pipe Mount Kit required. Available separately.

#### Optional Mounting Plates for Roof Mounts
- Flat Roof Adapter for Parapet Mount
  - LTC 9230/01

#### In-ceiling Support Kits
- VGA-IC-SP (Bracket for suspended or drop ceilings)
Dimensional Drawings

**AUTODOME 7000 series - Slot for SD card**

1. Power supply box and sunshield
2. Sunshield removed
3. Mounting plate
Ordering information

VG5-7230-CPT5 PTZ 2MP HDR 30x tinted IP54 in-ceiling
Superb quality indoor IP PTZ dome camera. 1080p HD resolution; 30x optical zoom; Intelligent Video Analytics; PoE; iSCSI/SD; multiple pre-programmed user modes; H.264 quad-streaming (CPP4); IP54. In-ceiling mount, tinted bubble.
Order number VG5-7230-CPT5

VG5-7230-EPC5 PTZ 2MP HDR 30x clear IP66 pendant
Superb quality indoor/outdoor IP PTZ dome camera. 1080p HD resolution; 30x optical zoom; Intelligent Video Analytics; PoE; iSCSI/SD; multiple pre-programmed user modes; H.264 quad-streaming (CPP4); IP66. Pendant mount, clear bubble.
Order number VG5-7230-EPC5

VG5-7230-EPR5 PTZ 2MP HDR 30x clear IK10 pendant
Superb quality indoor/outdoor IP PTZ dome camera. 1080p HD resolution; 30x optical zoom; Intelligent Video Analytics; PoE; iSCSI/SD; multiple pre-programmed user modes; H.264 quad-streaming (CPP4); IP66. Pendant mount, IK10-rated bubble. Available in specific regions only.
Order number VG5-7230-EPR5

Accessories

NPD-6001B High PoE midspan
High PoE Midspan, 60 W, single port, AC in for AUTODOME 7000 cameras and for MIC7000 cameras without illuminators.
Order number NPD-6001B

NPD-9501A Midspan, high PoE, single port, AC in
High PoE, 95 W, Single port indoor Midspan. 120/230VAC input. Supplies a data and power interface to camera using a single standard CAT5e (or better) network cable.
Order number NPD-9501A

VG4-A-PSU0 Power supply, 24VAC
Power supply, 24 VAC input, for a PTZ camera in the AUTODOME Series. White, aluminum enclosure with cover, rated IP66 and IK 08. 100 W output. Optional trim skirt (sold separately).
Order number VG4-A-PSU0

VG4-A-PSU1 PSU, 120VAC, for AUTODOME, MIC7000
Power supply, 120VAC input, 24VAC output @ 96VA. Suitable for powering AUTODOME, MIC IP 7000, and MIC IP fusion 9000i cameras. White aluminum enclosure with cover. IP66 ingress. IK10 impact.
Order number VG4-A-PSU1

VG4-A-PSU2 Power supply, 230VAC, AUTODOME, MIC7000
Power supply, 230VAC input, 24VAC output @ 96VA. Suitable for powering AUTODOME, MIC IP 7000, and MIC IP fusion 9000i cameras. White aluminum enclosure with cover. IP66 ingress. IK10 impact.
Order number VG4-A-PSU2

VGA-SBOX-COVER Cover for AUTODOME power supply box
Cover for AUTODOME Power Supply Boxes, white
Order number VGA-SBOX-COVER

VG4-SFPSCKT ETHERNET TO SFP INTERFACE KIT
Ethernet media converter video transmitter/data receiver fiber optic kit for AUTODOME cameras and for MIC-IP-PSU for MIC analog cameras.
Order number VG4-SFPSCKT

SFP-2 Fiber module, multimode, 1310nm, 2LC
SFP Fiber Optic Module, 2 km (1.2 miles), 2 LC connectors.
Multi-mode
1310 nm
Order number SFP-2

SFP-3 Fiber module, single-mode, 1310nm, 2LC
SFP Fiber Optic Module, 20 km (12.4 miles), 2 LC connectors.
Single-mode
1310 nm
Order number SFP-3

SFP-25 Fiber module, 1310/1550nm, 1SC
SFP Fiber Optic Module, 2 km (1.2 miles), 1 SC connector
Multi-mode
1310/1550 nm
Order number SFP-25

SFP-26 Fiber module, 1550/1310nm, 1SC
SFP Fiber Optic Module, 2 km (1.2 miles), 1 SC connector
Multi-mode
1550/1310 nm
Order number SFP-26

VG4-A-PA0 Pendant arm, power box, 24VAC, AUTODOME
Pendant arm mount with power supply box for an AUTODOME Series camera, no transformer, white
Order number VG4-A-PA0@1

VG4-A-PA1 Pendant arm, power box, 120VAC, AUTODOME
Pendant arm mount with power supply box for an AUTODOME Series camera with a 120 VAC transformer, white
Order number VG4-A-PA1

VG4-A-PA2 Pendant arm, power box, 230VAC, AUTODOME
Pendant arm mount with power supply box for an AUTODOME Series camera with a 230 VAC transformer, white
Order number VG4-A-PA2@1

VGA-PEND-ARM Pendant arm with wiring, for AUTODOME
Compatible with an AutoDome Series pendant housing
Order number VGA-PEND-ARM@1
VGA-PEND-WPLATE Mounting plate for VGA-PEND-ARM
Mounting plate for VGA-PEND-ARM, compatible with an AutoDome Series camera
Order number VGA-PEND-WPLATE

VGA-ROOF-MOUNT Roof parapet mount for AUTODOME series
Roof parapet mount, white
VG5-6xx/7xxx cameras require VG4-A-9543 Pipe Mount (sold separately).
NEZ-5130-/NEZ-5230- cameras require NDA-ADPTR-NPTMET (sold separately)
Order number VGA-ROOF-MOUNT

LTC 9230/01 Roof mount adapter
Flat Roof Mount Adapter for mounting a unit in an upright position on a flat surface.
Order number LTC 9230/01

VG4-A-9541 Pole mount adapter
Pole mount adapter for an AUTODOME pendant arm or a DINION imager, designed for poles with a diameter of 100‑380 mm (4‑15 in.), white
Order number VG4-A-9541

VG4-A-9542 Corner mount adapter for AUTODOME
Corner mount adapter for an AUTODOME pendant arm or a DINION imager
Order number VG4-A-9542

VG4-A-9543 Pipe mount for AUTODOME , white
Pipe mount, white, for an AutoDome Series pendant housing
Order number VG4-A-9543

VGA-IC-SP Suspended ceiling support kit,7”
Suspended ceiling support kit for dome cameras. Aperture Ø177 mm (Ø7 in). Maximum supported weight 11.3 kg (25 lb).
Order number VGA-IC-SP

VG4-A-TSKIRT Trim skirt for AUTODOME power supply box
Trim skirt for the following AutoDome Series power supply boxes:
VG4-A-PSU0, VG4-A-PSU1, and VG4-A-PSU2
Order number VG4-A-TSKIRT

VGA-BUBBLE-PCLA Bubble, pendant, clear
Low-impact acrylic bubble
Order number VGA-BUBBLE-PCLA

VGA-BUBBLE-PTIA Bubble, pendant, tinted
Low-impact acrylic bubble
Order number VGA-BUBBLE-PTIA

VGA-BUBLRG-CCLA Bubble, in-ceiling, large, clear
High-resolution bubble for AUTODOME in-ceiling cameras, clear
Order number VGA-BUBLRG-CCLA

VGA-BUBLRG-CTIA Bubble, in-ceiling, large, tinted
High-resolution bubble for AUTODOME in-ceiling cameras, tinted
Order number VGA-BUBLRG-CTIA

VGA-BUBHD-CTIA Bubble, in-ceiling, tinted
High-resolution acrylic bubble for AUTODOME HD in-ceiling cameras, tinted
Order number VGA-BUBHD-CTIA

VGA-BUBBLE-IK10 Bubble, pendant, IK10-rated
IK10-rated bubble qualified for use with AUTODOME 7000 HD cameras with pendant housings
Order number VGA-BUBBLE-IK10
