

# Complete Video Management made easy

**BOSCH**  
Invented for life

The Bosch VMS is built from the ground up with fast out-of-the-box deployment and easy to use configuration and operation in mind. Enriched by powerful VMS features, this makes it a strong solution for small installations. Setting the foundation from the beginning, you ensure you can easily grow when the need arises, while you always keep the same user interface and recording format. Never worry about investing in a new solution from scratch again.

## Installation made easy

The Bosch VMS is especially easy to install for small applications. Everything is installed out-of-the-box with just a few clicks for instant start-up. When required, you can adapt the system to your personal needs.

## Configuration made easy

Automatic discovery and assignment of IP addresses as well as advanced copy facilities speed up system configuration and ensure consistency throughout the application. Installation and system maintenance costs are considerably reduced by eliminating the need to configure individual devices or recording services.

## All-in-one made easy

All Bosch VMS components run on one workstation for small installations, while recording can be realized on one of Bosch's reliable and cost-effective storage solutions. Small installations benefit from powerful VMS features as multi-monitor support and keyboard control,

## Recording made easy

The Bosch VMS enables you to get from installation to an active recording system with very few mouse clicks. The unique configuration workflow and the graphical setup of recording schedules allow for a quick but thorough recording set-up. Any camera added to the system is a complete active part of your security system within minutes. Using the same recording format from local recording on Bosch IP cameras to large enterprise storage makes growing hassle free.

## Operation made easy

Bosch invests heavily in usability testing to optimize user interfaces. The ergonomic interface of Bosch VMS reduces the complexity of video management, allowing personnel to operate more efficiently and effectively. Simple drag and drop operation allows for intuitive use of the system, and the smart cameo concept enables the operator to view, control and playback the camera, all from one window.

## Scalability made easy

Our flexible licensing system makes it easy to add additional channels, workstations and even functionality when the need arises, making sure the system can grow with your needs. In addition, the system supports several legacy recording solutions, allowing easy migration and maintaining a cost-effective system.
