

## Internet Explorer 7 Security

**Affects:**

- **FPA-1000-UL Offline Configuration Tool**
- **FPA-1000-V2 Offline Configuration Tool with converter to 2.01**

**1.0 Issue**

To use either of these Offline Configuration Tools, you must modify Internet Explorer 7's security settings.

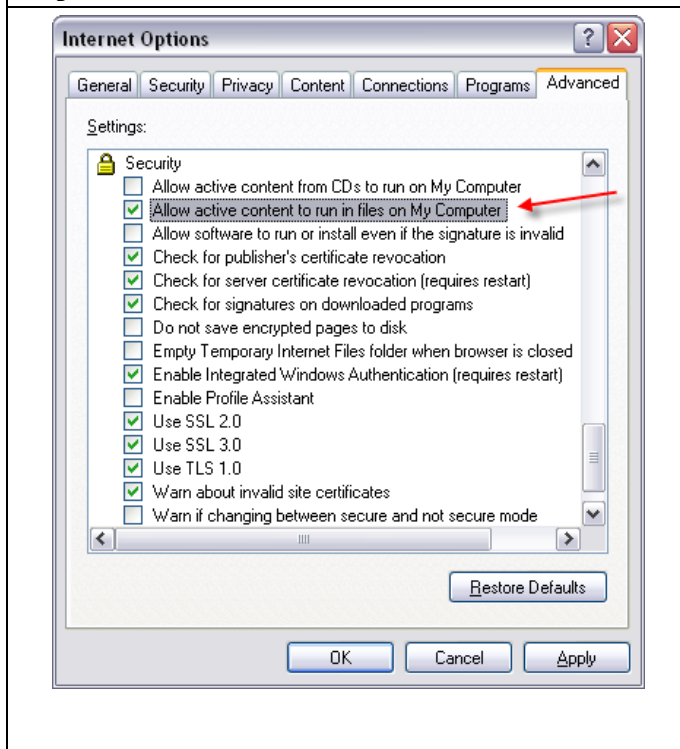

When using the Offline Configuration Tools, Bosch Security Systems, Inc. recommends a screen resolution of 1024x768 or higher.

**2.0 Resolution**

Perform the following procedure to modify Internet Explorer 7's security settings:

1. Open Internet Explorer 7.
2. Select **Tools** → **Internet Options...**
3. Select the **Advanced** tab.
4. Scroll to the **Security** settings.
5. Place a check mark in the **Allow active content to run in files on My Computer** option.

**Figure 1: Allow Active Content**

6. Click **OK**.
7. Restart Internet Explorer 7.
