Security and automation for your mobile life

BOSCH

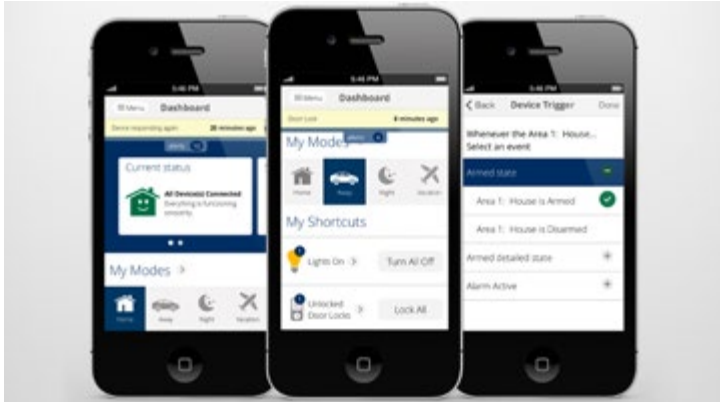

Invented for life

Smart, connected systems that control security, lighting, heating, cooling and more—all customized for your home or business.

Automatically turn lights on and instantly change thermostat settings when you disarm your security system. Leave home and select 'Away' on your smart phone app to automatically lock the doors, arm your security system, turn off interior lights and adjust the thermostat. With Bosch, home control has never been more effortless.

Bosch's support of industry-standard Z-Wave devices provides flexible, wireless control of internal and

external lights, door locks, thermostats, IP video, and more. Combined with Bosch's award-winning B Series control panel, homeowners and businesses have a powerful solution that brings together the best in intrusion prevention, fire detection, home automation and remote monitoring. Get a text message or email when your doors are unlocked. View still images or live video so you know everything is safe and secure, even when you're miles away.

Advantages

- ▶ Integrate the B Series or new G Series Control Panels with standard Z-Wave-enabled devices
- ▶ Automate home monitoring and control including cameras, lights, locks and more
- ▶ Control everything from a smart phone or other Internet-enabled device via an easy-to-use Web interface

Installation and set up

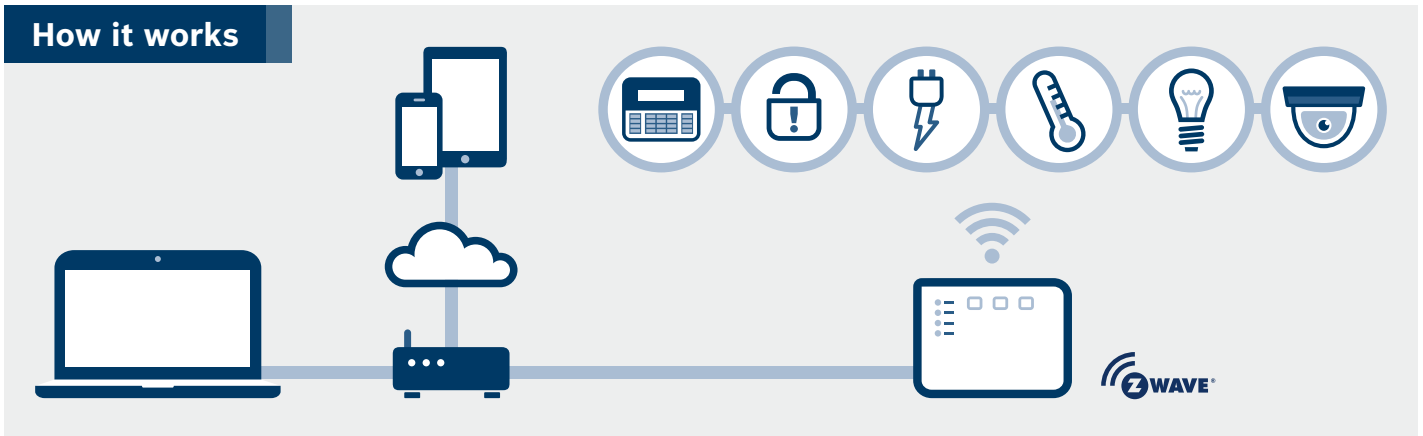

- ▶ The Bosch B Series and new G Series panels connect to Z-Wave devices using the Home Control Gateway from Bosch
- ▶ The Gateway connects to a Wi-Fi router, broadband modem or wired gateway to link all the devices to the intrusion panel
- ▶ A user-friendly dashboard completes the set up from a mobile device or Internet-enabled computer

- ▶ An accompanying G100 Service Plan securely manages stored video and other system data in the cloud

Requirements

- ▶ Bosch B Series or new G Series Control Panel
- ▶ Bosch Z-Wave Home Control Gateway
- ▶ Active dealer account
- ▶ Z-Wave-compatible devices for automation

How it works

Adding Z-Wave home automation features to a Bosch control panel, new or installed, is fast and easy. No wires to run means a quick, no-fuss installation. Once installed, the system set up and ongoing operation can be controlled 24/7 from a user-friendly interface for mobile devices and Internet-connected computers. The app provides one-touch arming of multiple devices for common modes such as Home, Away, Night and Vacation. The associated cloud service stores system data without additional hardware.

Features	Benefits
Compatibility with Z-Wave devices	Offers a full suite of automation solutions including internal/external lighting, cameras, door locks and thermostat controls
Visual scene-creation wizard	User-friendly interface eliminates complex programming and set up requirements for device triggers
Intuitive app for mobile (iOS and Android) and PC	Control key security devices from anywhere 24/7
Real-time remote system monitoring	Provides automated system feeds and executes follow-up actions
Cloud storage service	Easily store, manage and retrieve system data, video recordings, etc. in the cloud
